WHAT IS A PANDEMIC?

WHAT ARE INFECTIOUS DISEASES?

INFECTIOUS DISEASES ARE THOSE CAUSED BY...

Bacteria, viruses or parasites

TUBERCULOSIS

MUMPS

COVID-19

**cold
or
flu**

MITES

HIV

WHAT'S COVID-19 AND THE VIRUS THAT CAUSES IT?

COVID-19 is caused by a virus:

-  The virus is called SaR-CoV-2 and the disease is COVID-19.
-  It is a virus in the CORONAVIRUS family that causes respiratory disease.
-  Emerged in 2020. There is no cure, for the moment, but there is treatment.
-  We transmit it when speaking, breathing, shouting, or sneezing.

HOW IS THE CORONAVIRUS TRANSMITTED?

WHAT ARE COVID-19 SYMPTOMS?

We can expect:

Nausea or vomiting

Congestion or runny nose

Recent loss of smell or taste

Cough

Fever or chills

Difficulty breathing (feeling short of breath)

Headache

Sore throat

Fatigue

Muscular and body aches

Diarrhea

We must go to the hospital if there is:

Difficulty breathing

Pale, gray, or bluish skin, lips, or nails

Unable to wake up or to stay awake

Confusion

Persistent pain or pressure in the chest

WHO SHOULD TAKE EXTRA CARE?

HOW DO WE PROTECT OURSELVES?

WHAT ARE VACCINES AND HOW DO THEY PROTECT US?

THE IMMUNE SYSTEM AND VACCINES

IT'S THE DEFENSE SYSTEM THAT PROTECTS US FROM DISEASES LIKE COVID-19. PEOPLE WITH A WEAK IMMUNE SYSTEM GET SICK EASILY. VACCINES ACTIVATE THE DEFENSE SYSTEM AGAINST DISEASES.

WHAT TYPES OF COVID-19 VACCINES ARE AVAILABLE?

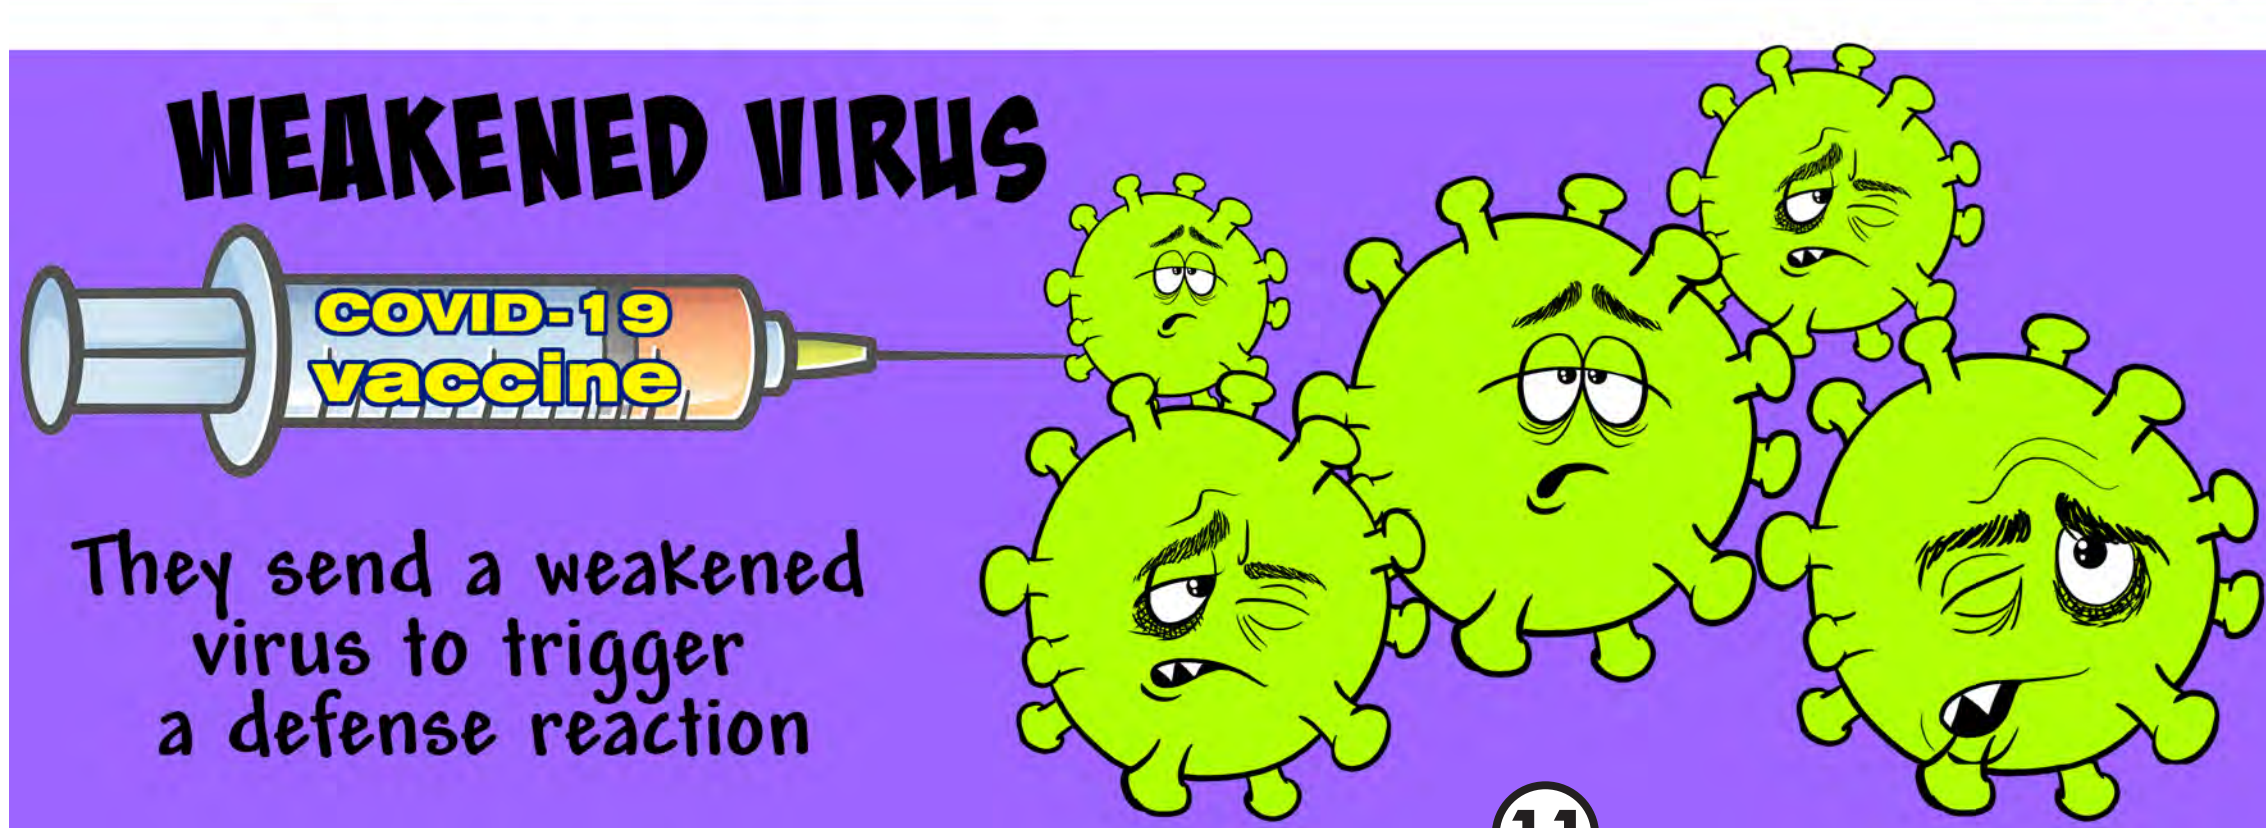

There are two types of vaccines and they work differently

RNA messenger COVID-19 vaccine

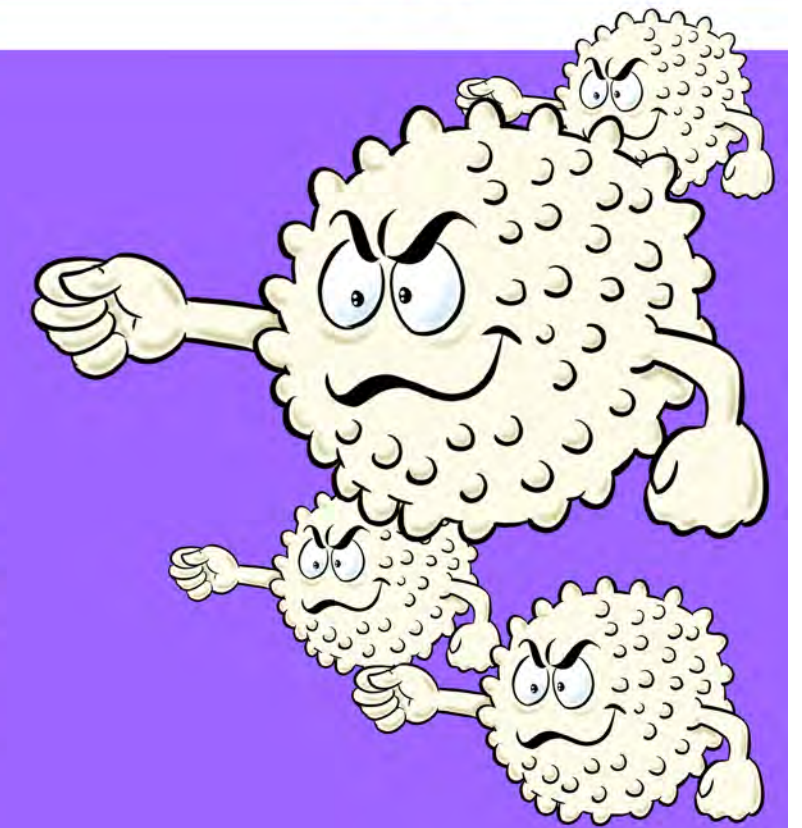

They alert the defense system to activate it

HERE COMES THE VIRUS!
HERE COMES THE VIRUS!
HERE COMES THE VIRUS!

WEAKENED VIRUS COVID-19 vaccine

They send a weakened virus to trigger a defense reaction

WHAT DO THE mRNA COVID-19 VACCINES CONTAIN?

mRNA (Messenger Ribonucleic Acid)

A fatty coating layer to protect the mRNA

A combination of water, sugars, salts, and PEG (polyethylene glycol) a substance that transports other ingredients

THE VACCINES DO NOT HAVE:

Preservatives, blood products, fetal cells, pork or egg products

The mRNA cannot change DNA in any way or form

IN SEPTEMBER 2023,
THE GOVERNMENT AUTHORIZED
THE USE OF UPDATED VACCINES
FOR PEOPLE 6 MONTHS
AND OLDER. THE CURRENT
RECOMMENDATIONS ARE...

People 65 and older

1 additional dose of the updated vaccine in the spring

People with weakened immune systems

Talk to your health care provider to see if you are eligible

Unvaccinated

1 dose of the updated vaccine

Previously Vaccinated

1 dose of the updated vaccine at least 2 months from the last dose

Unvaccinated Children 6 months – 4 years

2 doses of the Moderna updated vaccine
or
3 doses of the Pfizer-BioNTech updated vaccine

Vaccinated Children 6 months – 4 years

The number of doses of the updated vaccine depends on the brand and the child's vaccination history

VACCINES AND COVID-19, MYTHS AND FACTS

Many things are said about the vaccine

FALSE

TRUE

WHAT CAN WE EXPECT WHEN WE GET VACCINATED?

What can we expect when we get vaccinated?

You can have pain in your arm, a headache, fever, or chills.

After a few days, the symptoms will disappear, and you will feel better.

¡Qué saber sobre la vacuna contra COVID-19!

- COVID-19: Es importante vacunarse, aunque ya haya tenido COVID-19.
- Preparación: La preparación no todos, incluyéndola las imágenes y los requisitos de seguridad de identificación.
- Seguridad: Hay que vacunarse. Una vez que se vacuna, todos los signos y síntomas.
- Síntomas: Después de vacunarse puede tener dolor de brazo, dolor de cabeza, fiebre o escalofríos.
- Mejoría: Se sentirá mejor después de unos días.
- Protección: Pasará varias semanas antes de que la vacuna le proteja completamente.
- Seguridad: Debe seguir usando mascarillas, lavarse las manos y mantener distancia.
- MCN: ¡Haga una cita para VACUNARSE!
- Gratificación: ¡Felicidades, ya hizo su parte para mantenerse a usted y a los demás a salvo!

VACUNACIÓN ES PROTECCIÓN

¡Vacúnate contra COVID-19!

Wash YOUR HANDS!

Hands that look clean can still have icy germs!

- Wet
- Get Soap
- Scrub
- Rinse
- Dry

www.cdc.gov/handwashing

THE COVID-19 VACCINE HELPS PROTECT YOU & YOUR FAMILY.

A safe and effective vaccine to protect against COVID-19 is now available.

www.cdc.gov

COVID-19 STOP THE SPREAD OF GERMS

FOR EVERYONE'S HEALTH AND SAFETY

PLEASE KEEP YOUR PHYSICAL DISTANCE

Physical distancing means **6 FEET APART** from others.

www.cdc.gov/COVID19

WHAT DOES THE END OF THE COVID-19 HEALTH EMERGENCY MEAN?

THE NATIONAL COVID-19 EMERGENCY ENDED IN MAY 2023. THIS MEANS THAT PROGRAMS AND AID RELATED TO THE PANDEMIC ALSO ENDED.

AND COVID-19 VACCINES, TESTS, AND TREATMENTS MAY NO LONGER BE FREE.

BUT VACCINES ARE STILL NECESSARY AND VITAL

How to prepare?

If you have NOT been vaccinated or got the updated vaccine,

GET VACCINATED!

Stay informed of what's happening

To prevent misinformation and myths, verify the information you receive before resharing it

WHAT SHOULD WE DO?

CONTINUE TO PROTECT OURSELVES

Wear a mask
in closed spaces

Maintain
social distance

Wash your hands

Improve ventilation

Avoid contact with
infected people

Take a COVID-19 test
at home if you have
symptoms or were
exposed

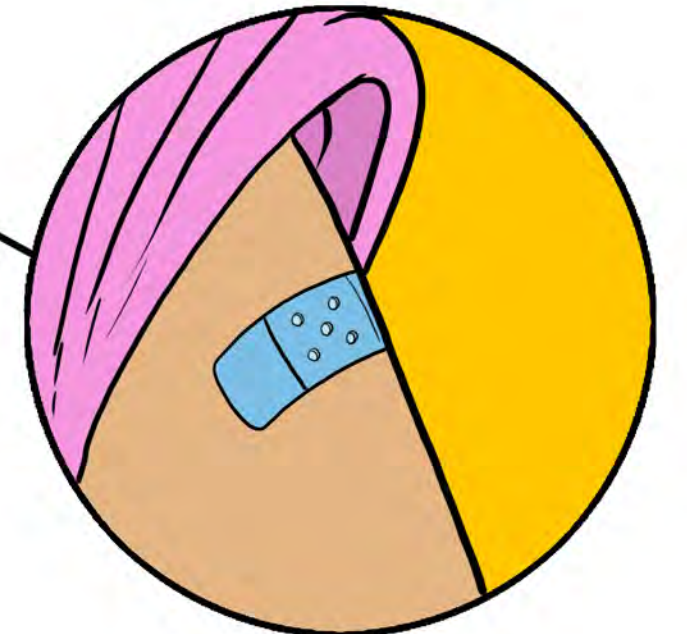

Know your rights in
relation to COVID-19
at work

WE HAVE ALREADY BEEN VACCINATED, DO WE STILL NEED TO PROTECT OURSELVES?

YES, YOU STILL HAVE TO PROTECT YOURSELF.

WHEN WE PROTECT OURSELVES, WE TAKE CARE OF OTHERS. THE VIRUS KEEPS CHANGING AND WE NEED UPDATED DOSES. EVEN IF WE ARE VACCINATED, THERE ARE STILL RISKS.

Updated dose

WHAT OTHER RISKS SHOULD WE CONSIDER?

Ask yourself:

What is the level of transmission in the area where I live?

Is it ventilated?

Am I sick or do I have a condition that would make it easier for me to get sick?

When was my last vaccine?

Will I be inside or outside?

How many people will be gathered?

Is there a person who is sick in the group?

What kind of work do I do?

VENTILATION IS VERY IMPORTANT

NATURAL VENTILATION

Open doors and windows. Use fans directed at windows.

INSTALLATION OR IMPROVEMENT OF FILTERS

Filters capture more contaminated particles.

USE AIR PURIFIERS

High-efficiency filters (HEPA) capture contaminated particles.

ADJUST

Air conditioners (AC), heating and cooling systems.

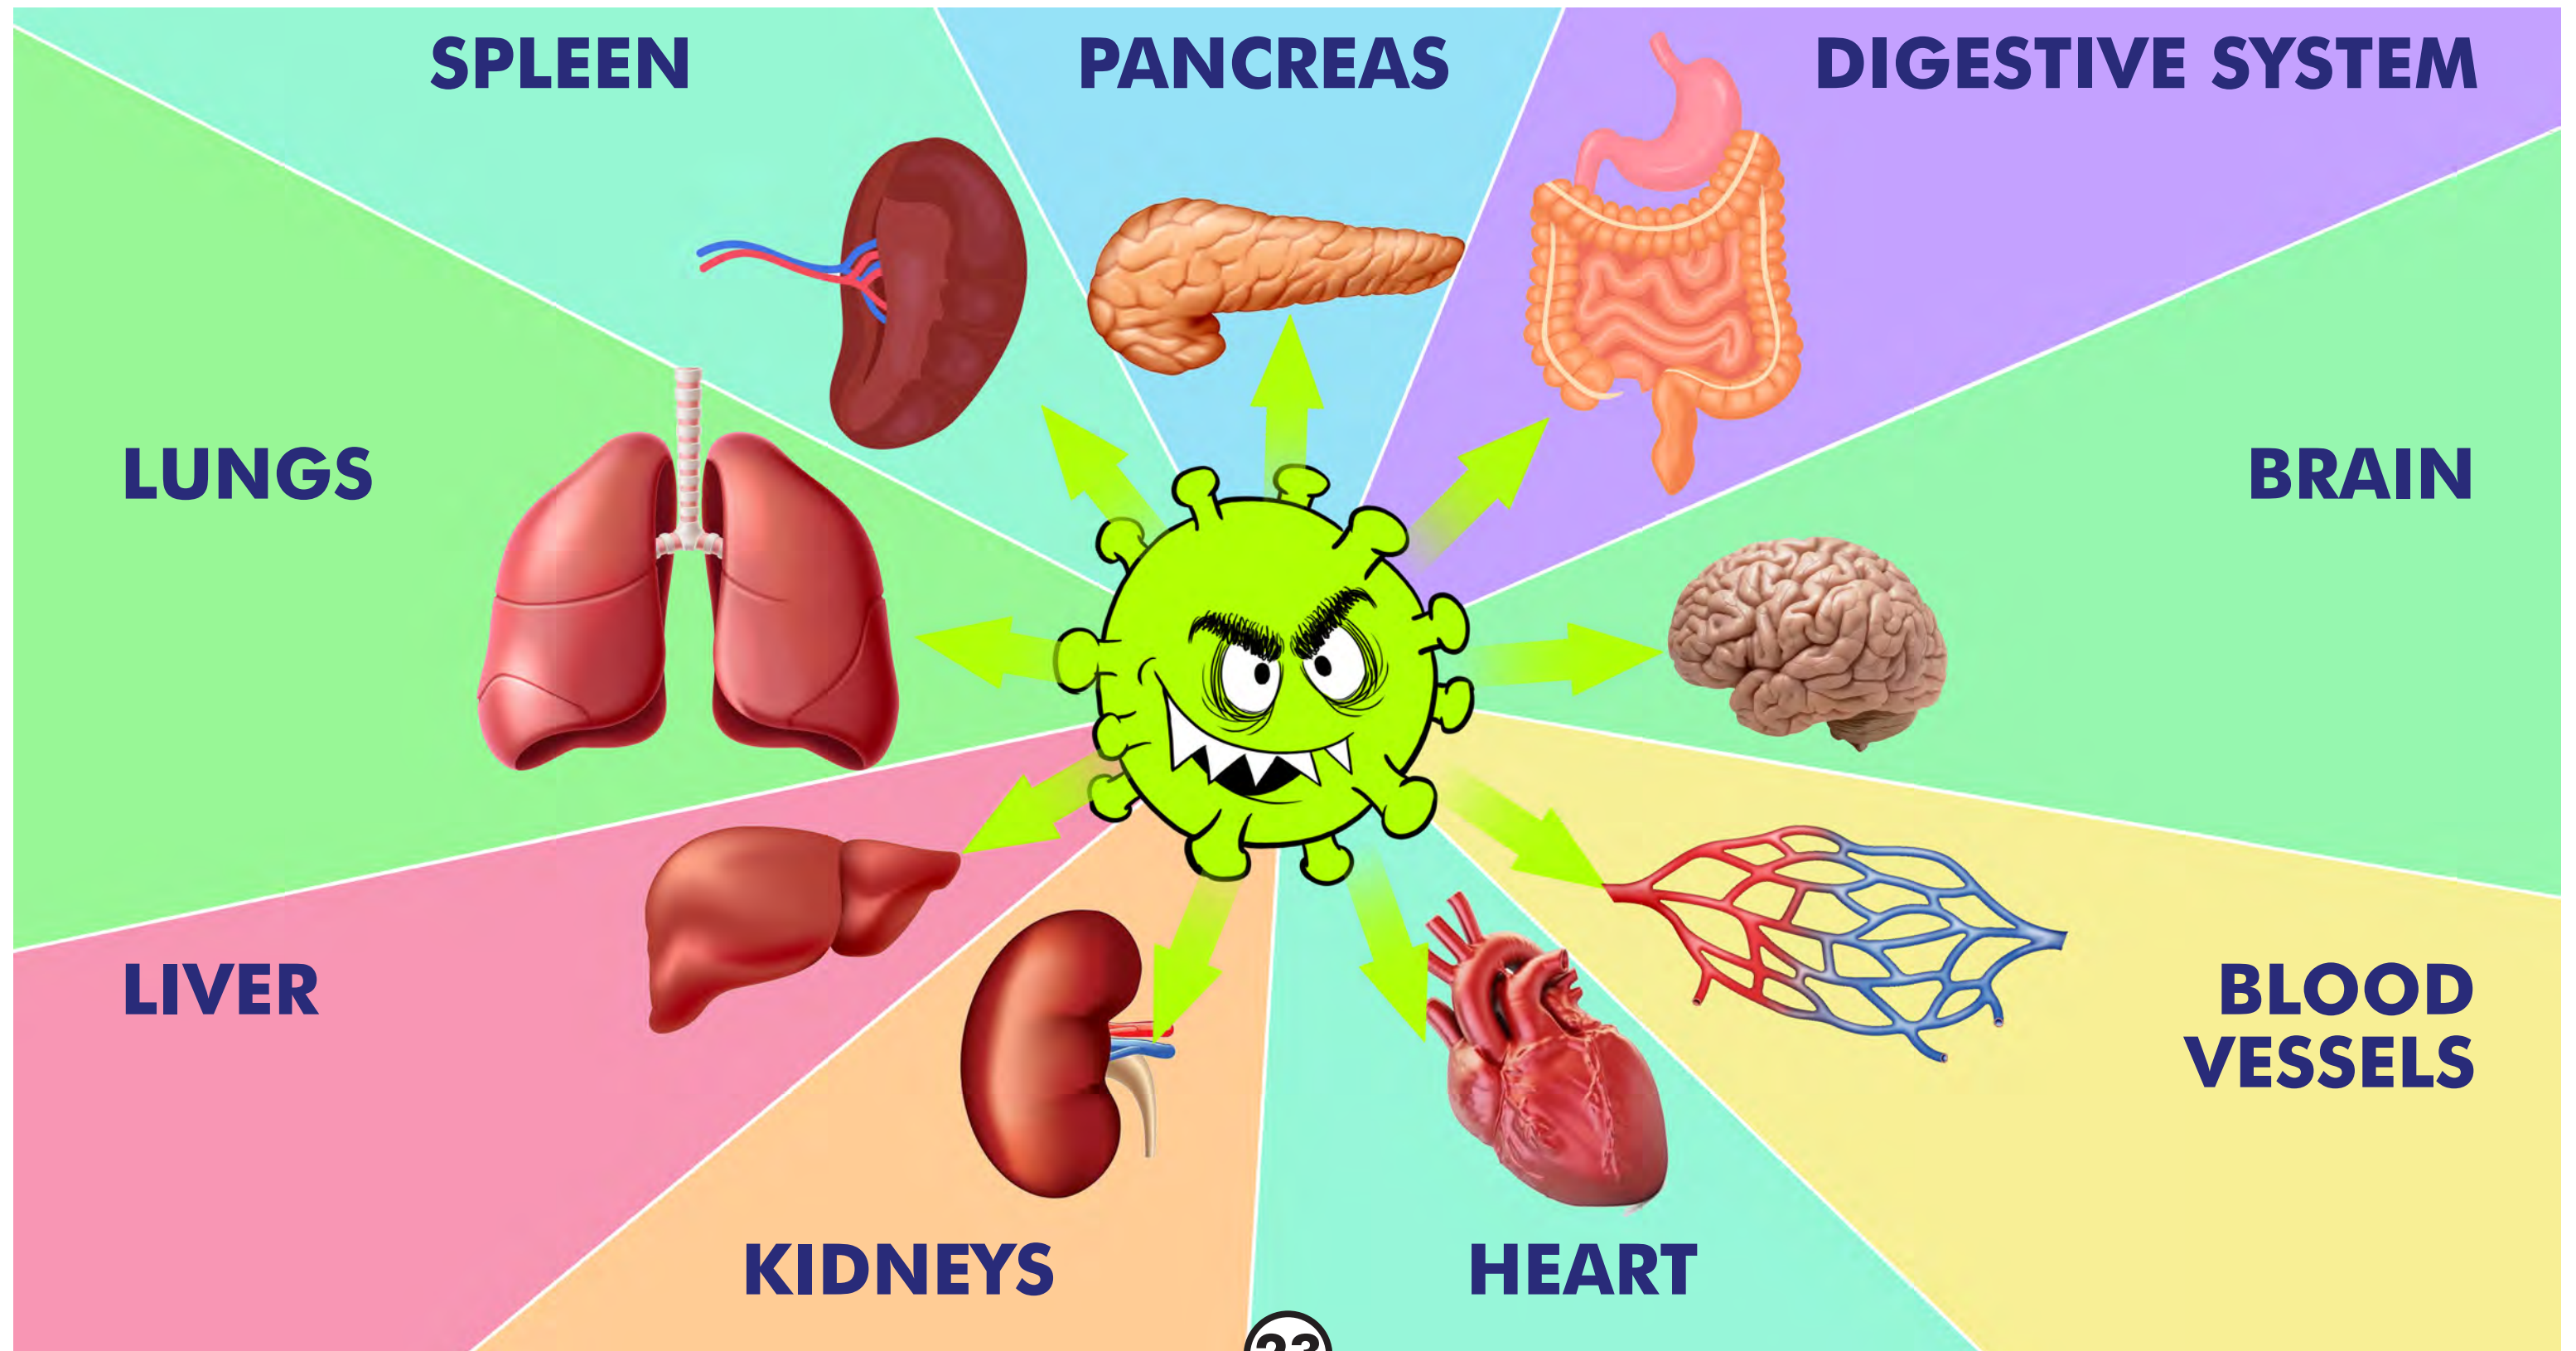

HOW DO WE USE FACE MASKS CORRECTLY?

HOW CAN WE FIGHT AGAINST THE VIRUS?

WHAT IS PERSISTENT OR LONG COVID-19?

CAN WE STILL BECOME SICK WITH COVID-19 ONCE WE ARE VACCINATED?

YES, WE CAN ALL GET SICK EVEN IF WE ARE VACCINATED.

- THE VACCINE PROTECT US FROM:
- ✓ BECOMING SERIOUSLY ILL
 - ✓ BEING HOSPITALIZED
 - ✓ DYING FROM COVID-19
 - ✓ HAVING LONG COVID-19

WE HAVE TO LEARN TO LIVE WITH THIS VIRUS. ALTHOUGH IT IS NO LONGER AN EMERGENCY, THE VIRUS IS STILL WITH US.

COVID-19: HOW HAS IT AFFECTED US?
