POLICY TITLE: CLINICAL GUIDELINES

POLICY: Clinical practice guidelines that are consistent with the organization's mission and priorities are selected and implemented by a clinical leadership team and the Board of Directors.

PURPOSE:

1. Clinical practice guidelines provide a means to improve quality, enhance appropriate utilization of health care services, and enhance the value of health care services.
2. Clinical practice guidelines assist practitioners and patients in making clinical decisions on the prevention, diagnosis, treatment, and management of selected conditions.
3. Clinical practice guidelines can be used in designing processes or checking the design of existing processes.

PROCEDURE:

1. The Peer Review Committee is appointed by the Quality Assurance Director and consists of a multi-disciplinary team of health care professionals.
2. The Quality Assurance Committee determines criteria for selection of practice guidelines.
3. The Board of Directors is presented with and approves the criteria for selection of practice guidelines.
4. The members of the Peer Review Committee direct development of new practice guidelines and the revision of existing guidelines.
5. New guidelines are reviewed by the Peer Review Committee prior to implementation (see review form).
6. New guidelines are presented yearly to the Board of Directors for approval.
7. Effectiveness of practice guidelines is evaluated by peer chart reviews, which is directed by the Quality Assurance Department.
8. Results of chart reviews are reported to the Board of Directors.
