

# Celebrating the First Anniversary of the External Advisory Board at MCN

The first MCN External Advisory Board (EAB) was established with 10 standing members and 10 ad hoc members in June 2015. The EAB is a **PEER TECHNICAL AND SCIENTIFIC COMMITTEE** established to promote cross-disciplinary collaboration and to give expert advice on community-based participatory research and the development and expansion of MCN programs. The distinguished members offer a breadth of professional expertise to advance MCN's mission.

During the first year of service, our EAB members participated in more than **44 ACTIVITIES AMONG 10 MCN STAFF**. This totaled more than 246 direct hours of collaboration by providing their expertise and technical assistance in grant and award preparation, scientific consultation, conference planning, and expanding the vision of MCN among their constituencies.

Dr. Zayas & Virginia Raymond, JD, PhD at the Women's Leadership Conference

## 2015 Principal Accomplishments
